

Planned Preventative Maintenance Agreements

Ensure Full Compliance

The SRH International Preventative Maintenance Agreement covers surveys, overhauls and pre-agreed replacements such as magnetrons, gyrospheres, batteries and motors.

We also track renewal dates ensuring the equipment is maintained to the manufacturer's recommendations reducing the chance of a failure and keep a maintenance record for analysis.

Minimise Your Workload

Do your superintendents or vessel managers have time to ensure the subcontractor in Santos is manufacturer and IASC approved? Do they have time to check when overtime rates apply or if the charged hours match the service report?

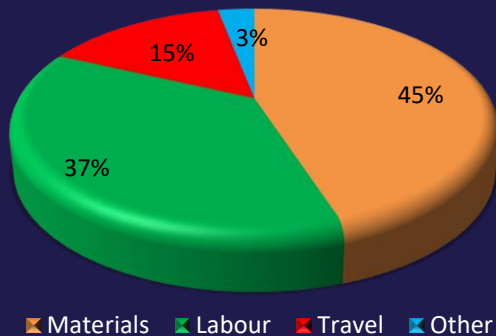

SRH International handles the administrative burden, allowing your staff to concentrate on their more important duties

Global Subcontractor Network

SRH International operates globally through its network of subcontractors, utilising the available labour when needed and avoiding the overheads of employing our own staff such as rent, utilities, training, holiday etc. Each subcontractor is checked to ensure they are manufacturer approved ensuring they have access to manuals, software and approved spares.

You Stay in Control Of Your Costs

When failures do occur, SRH International can provide assistance and recommendations however you stay in full control of your costs making the ultimate decision on dispensation, repair, reconditioned spares or replacement with new equipment.

Additional Benefits

By following a preventative maintenance procedure the equipment downtime is reduced at the same time increasing equipment longevity and life span. Maximising the uptime also ensures the vessels can operate safely without delays or detention.
